

Filling machine Type FFD

For the filling of all kinds of liquid products into various shapes of bottles and container.
Capacity according to number of filling valves and product 800 - 10.000 container/h.

Technical Specifications

Equipment:	<ul style="list-style-type: none">● Machine with 1-12 filling positions● Materials in contact with the product according to the requirements● Filling volume is free programmable● Process data adjustable via touch panel● Filling volume according to requirements: 5 ml - 20 l (as per machine design)● With all necessary sensors and PLC-control Siemens S7● Flow control by inductive or mass flow meters (Coriolis)
Power supply:	230/400 V
Air pressure:	6 bar
Options:	<ul style="list-style-type: none">● Execution for Ex-areas according to ATEX-guides
